INFORMATION DISCLOSURE STATEMENT

SIR:

Pursuant to 37 C.F.R. 1.56 AND 37 C.F.R. 1.97-1.98, Applicants submit the documents cited on the attached PTO-Form 1449. Copies of the above-noted documents are submitted herewith. Each of the references cited in Form 1449 is briefly discussed below. Each item of information contained in this Information Disclosure Statement was cited in a search report issued by the EPO in applicants corresponding EPO patent application. The

search report issued on May 5, 2004. A copy of the search report is attached. The date of issuance of the EPO search report is not more than three months prior to the filing of this statement.

The EPO search report cited the references discussed below. Contrary to allegations made in the search report regarding the relevance of these references, it is submitted that none of these references are relevant to applicants claimed invention. Each of the references is discussed below.

1. Japanese Kokai 61202744 is directed to a lost wax mold. The abstract teaches addition of fibers to slurry. Nothing in this reference teaches or suggests use of dry blends of refractory filler and fiber as in the claimed invention.
2. Japanese Kokai 57206548 is directed to a fiber composition for use in a mold. The Kokai shows forming slurry by suspending refractory powder and then adding inorganic fibers to the slurry. Nothing in this Kokai teaches or suggests the use of dry blends as in the claimed invention.
3. Japanese Kokai 11156482 is directed to a mold for casting. Refractory slurry that is supplied to a mold includes a refractory such as fused silica together with colloidal silica. This reference fails to teach or suggest the use of dry blends as in the claimed invention.
4. EPO 0763392 shows use of an aqueous slurry that includes ingredients for the formation of a calcium silicate matrix and a carbon fiber. Nothing in this reference, however, teaches or suggests use of dry blends of fiber and refractory powder as in the claimed invention.
5. WO 00/05009 is directed to a ceramic shell mold. Nothing in this reference teaches or suggests use of dry blends of refractory filler and fiber as in the claimed invention.
6. US 3878034 is directed to a refractory laminate. Nothing in this reference teaches or suggests use of dry blends of refractory filler and fiber as in the claimed invention.
7. US 5738819 is directed to manufacture of ceramic shell molds. Nothing in this reference teaches or suggests the use of dry blends of refractory filler and fiber as

in the claimed invention.

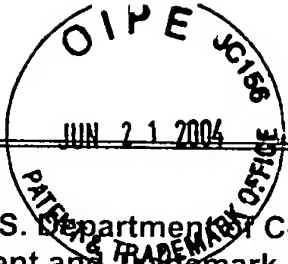

8. US 4196769 is directed to manufacture of ceramic shell molds. Nothing in this reference teaches or suggest the use of dry blends of refractory filler and fiber as in the claimed invention.

I hereby certify that the enclosed reference(s) were not cited in a communication from a foreign Patent Office concerning a counterpart foreign application or known to any individual designated in § 1.56(c) more than three months prior to the filing of this Statement.

Respectfully Submitted,

A handwritten signature in black ink, appearing to read "J. A. Parrish", written in a cursive style.

John A. Parrish
